

USER GUIDE FOR MAGENTO 2 EXTENSION

Ajax Compare

Version: 1.0.2

Ajax Compare

Ajax Compare extension for Magento 2 helps admin increase the customer experience with many convenient features. This module helps to improve product comparison features with Ajax. Every time an user triggers a product comparison, the system will reload the whole page but Ajax compare will help the system to handle these tasks without reloading the page.

1. Features

The extensions feature are listed below,

- Allows the admin to enable/disable the module.
- When clicking on the compare icon, the product will be added to the compare list using AJAX.
- The compare icon will change to red color which shows that the product is added to the compare list.
- A success message will be added in the message section at the top of the page.
- The Compare section in the left/right sidebar of the page displays the newly added product.

2. Configuration settings for Ajax Compare

A simple configuration will activate the Ajax compare extension in your website. The path and field details to configure are shown below,

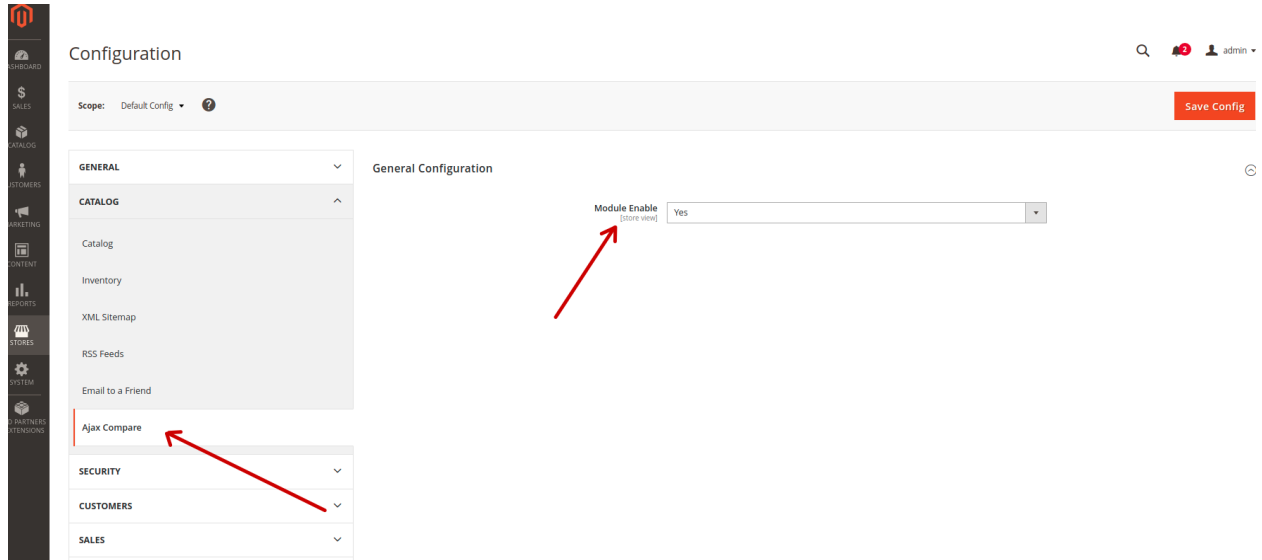

Path to configure

Stores --> Configuration -->Catalog -->Ajax Compare -> General Configuration

General configuration
