

USER GUIDE FOR MAGENTO 2 EXTENSION

Ajax Sort

Version: 1.0.2

Ajax Sort

Ajax Sort Extension in Magento2 enables the sorting option in the product listing page, search results page and advanced search results page without reloading the current screen. Admins can configure the use of Ajax Sort by either enabling/disabling the extension, also they have the control on applying the Ajax Sort extension on the above mentioned pages.

1. Features

The extensions features are listed below,

- Improved and suitable product sorting option.
- Ajax Sort will apply in the product listing page, search results page and advanced search results page.
- Change sorting order if needed.
- Focus on better performing products.
- Improves the user experience in sorting products.

2. Configuration settings for Ajax Sort

A simple configuration will activate the AjaxSort extension in your website. Below are the path and field details to configure.
