

# USER GUIDE FOR MAGENTO 2 EXTENSION Geolp

Version : 1.0.1

The Magento 2 GeoIP is a useful extension that detects the customers' location based on their IP addresses and automatically redirects the customer to the relevant store view as per their country. Module will help you identify your customer's countries and then redirect customers to the relevant store views. This feature of GeoIP will improve the shopping experience of customers when they can purchase at the appropriate store views.

# GeolP

### 1. Features

The GeoIP extensions' feature are listed below,

- Having enable and disable option, can be used as per the needs.
- Enhanced shopping experience.
- Automatically redirect users to custom URL (relevant store view)
- Restrict redirection for particular IP addresses
- Utilize users' IP addresses to detect their location
- Enhance user experience on shopping sites by allowing customers to purchase from their relevant store views.
- The extension detects the customer's geographic location and based on that redirects them to the relevant store view.

### 2. Configuration settings for Geolp

A simple configuration will activate the Geolp in your website. Below are the path and field details to configure

#### Path to configure

Stores -> Configurations -> General-> Web-> GeoIP

#### License key to configure

After successful installation of GeoIP extension, you are now required to configure the license key in the admin configuration section. You can set it from:

Before downloading the library , enter the License key and save configuration.

## 3. Backend Configuration for All Stores

Create a Multi website in your magento and must give the website code, store code name same as country code.

For example , you wish to redirect the belgium website for belgium users based on their IP address. You must give the Belgium country code (be) for website code and store code .

# 4. Navigation process

### 4.1 Before redirecting the website :

#### 4.2 After redirecting the website :

After the configuration, the store view has been changed based on the customer IP address.

### 3.5 Cache management

Need to click on the 'Flush Magento Cache' whenever any action has been performed.
